

Shot-clock readings still needed

Every field-goal attempt in the practice tracker that has no shot clock on it yet - **664** shots across 9 practices. Free throws are left out (no clock to read) and so is anything already tagged. Scrub the film to the time in the first column, read the clock, and write it in the last one. The # column is the event id inside that practice's eventLog, so a filled-in sheet maps straight back to the entry that needs the value. Data snapshot published 2026-09-16.

36 of those shots belong to players hidden from the published site; they are marked (hidden) in the Player column. Re-run with --skip-hidden to leave them out.

What each practice still owes
