

Scrimmage Teams

WHITE3 bigs / 2 wings / 3 guards				BLACK2 bigs / 3 wings / 3 guards			
1	Quian Khawaja	Guard	+5.99	1	Axel Ostergard	Big	+6.85
2	Eric Kubel	Wing	+4.91	2	Matthew Wilson	Wing	+5.63
3	Brendan Banks-Speed	Big	+1.90	3	George Hees	Big	+0.18
4	Alex Bello	Big	-0.68	4	Emmitt Claiborne	Wing	-0.72
5	Mikey Duran-Morales	Guard	-2.28	5	Ashton Carraway	Guard	-2.58
6	KaLeke Singletary-Jinks~	Big	-1.36	6	Sean Castro~	Guard	+0.41
7	Jaylen Smith	Wing	-2.40	7	SoulJah Niles	Wing	-2.52
8	Finn Ortiz	Guard	-3.52	8	Jack Johnson	Guard	-5.86

SHADED = OPENING FIVE · ~ = THIN SAMPLE, TREATED AS GROUP AVERAGE

OPENING FIVES	FULL ROTATIONS	FOR SCALE
+0.2 pts	+0.2 pts	±21 pts
White +9.84 · Black +9.37 per 100	White +3.73 · Black +3.23 per 100	SD of a single session margin per 100

Projected margin either way is **well under a point** across a 35-possession scrimmage — far inside the noise of any single run. The four highest-rated players split two per side, so neither team stacks the top end.

IF SOMEONE IS OUT

ABSENT		MOVE ACROSS TO REBALANCE
Axel Ostergard	→	Eric Kubel moves from White
Quian Khawaja	→	George Hees moves from Black
Matthew Wilson	→	Brendan Banks-Speed moves from White
Eric Kubel	→	George Hees moves from Black
Brendan Banks-Speed	→	George Hees moves from Black
Sean Castro		no change needed
George Hees		no change needed
Alex Bello	→	Emmitt Claiborne moves from Black
Emmitt Claiborne		no change needed
KaLeke Singletary-Jinks	→	Emmitt Claiborne moves from Black
Mikey Duran-Morales	→	Emmitt Claiborne moves from Black
Jaylen Smith	→	Emmitt Claiborne moves from Black
SoulJah Niles	→	Alex Bello moves from White
Ashton Carraway	→	Alex Bello moves from White
Finn Ortiz	→	SoulJah Niles moves from Black
Jack Johnson	→	Mikey Duran-Morales moves from White

Player Ratings

7 sessions · 65 stints · 264 possessions

Rating 0.00 = average for this group

HOW THESE WERE BUILT

Raw plus/minus was unusable. White has won all seven tracked sessions, and several players never switched jerseys — Claiborne went 7-for-7 on Black, Wilson 6-for-6 on White, Ostergard 5-for-5. On/off margin therefore mostly measures which jersey a player was handed. Claiborne grades at -21.6 per 100 on raw plus/minus; once his effect is solved for with teammates held constant, he is -1.7.

The rating blends two independent signals. 70% is box-score value per 100 possessions — points above an average shot at this scrimmage's efficiency, plus weighted credit for rebounds, assists, steals, blocks, deflections, turnovers and fouls. That measure is team-independent. The other 30% is ridge-regularized adjusted plus/minus, which solves for each player's effect with teammates and opponents held constant, and carries the defensive impact a box score misses. Ratings are then regressed toward the group average in proportion to minutes played, so a two-session sample cannot drift far from average.

The split balances two things at once: the strength of the opening fives and the strength of the full eight-man rotations. Rebounding, playmaking, scoring, defensive events, usage and position counts break the near-ties.

Validation. Replaying the event logs reproduces the published score of all seven sessions exactly. The split also holds under every alternative model tested — pure box score, pure RAPM, 50/50 and 85/15 blends, and shrinkage from none to heavy — staying within a point per scrimmage in each.

Two caveats. Sean Castro (5 minutes, one session) and KaLeke Singletary-Jinks (43 minutes, two sessions) have too little data to rate honestly; both sit near group average, are benched rather than started, and are placed on opposite teams so the uncertainty does not stack on one side. Attendance has ranged from 11 to 17, so treat the swap table on page 1 as the working document.
