WHO IS IRVINE VALLEY?

Team identity, style of play, and four-factors analysis.

Core Identity: Irvine Valley is a defense-first program — they win by holding opponents below what they should score. They finished 17-13, ranked **#48/100 in Net Rating** (+2.7 pts per 100 possessions). Offensive Rating: 100.4 (#53/100 statewide, state avg 100.6) — near average. Defensive Rating: 97.7 (#23/100 statewide, state avg 101.1) — above average. Point differential: +1.2 PPG (68.3 scored, 67.1 allowed).

Roster Profile — Size and Scoring Structure

Guard Dependence Index (GDI): 71.4 — #33/100 statewide (state avg 66.9). GDI measures how reliant a team is on guards for scoring and playmaking. Irvine Valley's 71.4 is above the state average of 66.9, meaning they are more guard-reliant than a typical CCCAA team. Scoring breaks down as: **guards 68.3%** · **wings 23.5%** · **bigs 4.9%**. Guards generate 74.5% of assists.

Offensive Profile — Near Average Efficiency (ORTg #53/100)

Shooting efficiency (eFG% 49.9%, #41/100; TS% 54.3%, #29/100): The state average is 49.6% eFG% and 52.7% TS%; Irvine Valley's eFG% sits at essentially the state average. TS% of 54.3% (+1.6 vs avg) reflects above-average overall shooting quality accounting for free throws and three-point volume.

FT Rate (37.5, #30/100, avg 33.9): Above-average access to the foul line. They get to the line and create free point opportunities that compound their offensive efficiency.

Ball security (TOV% 18.5%, #54/100, avg 18.7%): Average possession care statewide. NST% 8.9% (#73/100) captures unforced errors — decisions and live-ball mistakes opponents did not directly create. This is high relative to state average, meaning Moorpark can pressure the ball aggressively — their turnovers are largely self-inflicted.

Offensive rebounding (OREB% 22.1%, #90/100, avg 30.2%): Below average. Offensive rebounding at 22.1% (state avg 30.2%) is not a primary threat.

Defensive Profile — Above Average (DRTg #23/100)

Shooting suppression (Opp eFG% 47.8%, #26/100; Opp TS% 51.5%, #29/100): Opp eFG% is near the state average (47.8% vs 49.7% avg). Their defense holds opponents to ordinary efficiency — which means Moorpark's offense, executing at its normal level, should be able to score.

Turnover pressure (Opp TOV% 17.5%, #64/100 — near average at forcing opponent turnovers (17.5% vs state avg 18.6%). STL% 9.0% (#77/100), BLK% 3.2% (#80/100). Turnovers Moorpark commits are largely self-inflicted, not a product of elite pressure.

Defensive rebounding (75.5%, #11/100, avg 70.0%) and foul discipline (FC/40 4.4, #58/100): Above average on the defensive glass. Foul rate is near average: FC/40 4.4 (#58/100) . PF Eff 0.41 (#97/100) — steals plus blocks per foul.

Pace and Style

Irvine Valley plays at below-average pace: 69.3 possessions per game (#89/100, state avg 74.9). PPG: 68.3 (#17/100 statewide). Opp PPG allowed: 67.1. The slow pace means fewer possessions per game — half-court execution and shot quality matter more than transition.

Season Arc

Irvine Valley declined as the season progressed. First half (games 1–15): 11-4, avg net rating +6.9. Second half (games 16–30): 6-9, avg net rating -2.9. Their efficiency dropped as the schedule intensified.

HEAD-TO-HEAD: MOORPARK VS. IRVINE VALLEY 2025-26

Both meetings from Moorpark's perspective.

2/25/2026 — L 58–66 | Home (Moorpark) | Moorpark ORTg: 80.8 DRTg: 92.0 Net: -11.2

KEYS TO VICTORY — WHAT MOORPARK MUST DO

1. Contain Matt Mowers — 15.6 PPG, 24.3 MPG.	Matt Mowers leads Irvine Valley with 15.6 PPG and 6.6 RPG on 24.3 MPG (27 GP). Interior finisher: 59.6% on two-point attempts. Ind ORtg: 116.2. Usage: 30.1%. FT%: 80.0% on 5.2 FTA/g — avoid fouling in post position.
2. Limit Ahmad Alhammouri — 13.3 PPG.	Ahmad Alhammouri is Irvine Valley's second option at 13.3 PPG, 3.0 RPG, 1.4 APG in 22.9 MPG. Usage: 28.9%. Shooting 37.0% on 5.3 3PA/g.
3. Maintain shot discipline — Irvine Valley Opp eFG% #26/100.	Irvine Valley is a above average defensive team (Opp eFG% 47.8%, #26/100, state avg 49.7%). Shot selection and ball movement quality are critical — forced or rushed attempts will be punished by a defense that holds opponents below average.
4. Protect possession — Irvine Valley Opp TOV% #64/100.	Irvine Valley Opp TOV%: 17.5% (#64/100, state avg 18.6%). They rank outside the top 50 in turnover-forcing — Moorpark turnovers are largely self-inflicted, not a product of defensive pressure. Pace: 69.3 possessions/game (#89/100) — each possession surrendered carries proportionally higher marginal cost at this tempo.
5. Foul-target Zeno Calastas in late-game bonus situations.	Zeno Calastas shoots 61.0% from the foul line on 1.5 FTA/g — the lowest FT% among rotation players with meaningful foul-line usage. Intentional foul targeting is a viable late-game strategy in bonus situations.

Summary: Irvine Valley finished 17-13 (Net Rating +2.7, #48/100 statewide). ORTg: 100.4 (#53/100). DRTg: 97.7 (#23/100). Primary offensive benchmark: sustaining Moorpark ORTg above Irvine Valley's season DRTg of 97.7.
